Adult Respiratory Assessment Skills Checklist #DAHS-NSCARA14	Date	Verifier Initials
Note type of oxygen delivery system, method of airway management and/or mode of ventilation.		
Make general observation of patient's overall status.		
Observe for rate, depth, pattern, symmetry, and effort of respirations. Observe for use of accessory muscles.		
Observe for color and pallor of skin and mucous membranes.		
Observe for color, quantity, odor and consistency of secretions.		
Observe position of trachea.		
Auscultate in an orderly manner all lung fields and describe lung sounds appropriately.		
Palpate neck, chest, and shoulders to assess for the presence of subcutaneous air.		
Monitor and document oxygen saturations and End Tidal CO2 levels when appropriate.		
Describe/demonstrate method for contacting respiratory therapy.		
Have available in the patient's room, and know how to use, necessary respiratory equipment.		
Locate/describe emergency respiratory equipment.		
Document all pertinent information in the appropriate locations.

PowerFlow Implanted Apheresis Port DAHS-NSCPFIAP	Date	Verifier Initials
Prepare access materials, including a primed extension set		
Clean and prepare the access site prior to accessing per UCDH policy		
Stabilize the port with non-dominant, sterile gloved hand and palpate the funnel		
Using a shallow angle (30 degrees) of access, insert the needle into the funnel and slide it to the stop		
Separate needle from the IV catheter hub by pulling the needle slightly away		
Advance the IV catheter completely, continuing to pull the needle slightly away as needed		
Withdraw needle and engage safety mechanism		
Immediately attach the extension set, aspirate for blood return, and flush with normal saline		
Securely dress the site per Clinical Policy 13001: Vascular Access Policy (Adult/Pediatric)		
DE-ACCESS:		
Flush with normal saline to clear line		
Perform locking procedure by withdrawing the IV catheter while flushing continuously with locking solution to reduce potential for blood backflow into the catheter tip (5mL locking solution is recommended)		
After IV catheter removal, apply pressure if bleeding occurs		
Apply dressing per Clinical Policy 13001: Vascular Access Policy (Adult/Pediatric)
