

## **Database of Normative Scores for Mouse Behavioral Assays**

**from wildtype (WT) control and vehicle-treated control mice**

Includes graphs and spreadsheets\* of raw data from 22 experimental groups on 12 behavioral assays:

Acoustic startle

Elevated plus-maze

Juvenile reciprocal social interaction

Light↔dark transitions

Male-female social interactions with ultrasonic vocalizations

Marble burying

Novel object recognition

Open field

Prepulse inhibition of acoustic startle

Rotarod

Self-grooming

Social approach in 3-chambered apparatus

*\*Permissions to display results were obtained from Principal Investigators. Genetic backgrounds and sexes are listed on spreadsheets, where known.*
