Transitions of Care

Discussion on points of transitions between health care entities and services as well as components and structures of UC Davis Health Transitions of Care

Vanessa McElroy manages multiple complex critical programs impacting broad constituencies across UC Davis health system including ambulatory care management, health education, home care programs, managed care and utilization management, and transitions of care. She has a Bachelor's in Science Nursing and a master's degree in Health Nursing Informatics. She serves as a member in multiple hospital steering committees as well as local county committees and maintains annual participation in UCD Health System leadership programs serving as a mentor.
