CME will be provided**

## **Geriatric Pharmacology Management**

Dr. Boxer provides comprehensive care to older adults. Dr. Boxer is committed to listening to her patients and helping them to make decisions around their goals of care.

Dr. Boxer is a geriatrician caring for older adults with multiple chronic conditions, functional decline, dementia and frailty. Dr. Boxer has expertise in cardiovascular disease, particularly heart failure in the older population.

Dr. Boxer has broad research interests including heart failure disease management, nursing home care, systems of care for older adults, polypharmacy, and social determinants of health. Dr. Boxer primarily conducts pragmatic clinical trials and often collaborates with investigators in other specialties and disciplines.

Dr. Boxer currently works as a geriatrics, hospice and palliative care provider at UC Davis health.
