

## Our speaker:

Dr. White is chief of General Medicine, Professor of Medicine at UC Davis Medical Center specializing in Internal Medicine, thrombosis, anticoagulation and Rheumatology.

Dr. White's research centers on diagnosis, treatment and prevention of deep vein thrombosis and pulmonary embolism, which is collectively called venous thromboembolism. He runs a 3000 patient anticoagulation clinic and direct thrombosis specialty clinic where they conduct clinical research and do clinical epidemiology studies using large data bases.

His philosophy of care is to provide patients with all the knowledge necessary to understand and take responsibility for their medical condition.

Dr. Richard H. White
